1515 - 1530	Finish					

Speaker Profiles		

Claire Simpson	Claire Simpson qualified from the University of Liverpool in 1998, set on a career in Trauma & Orthopaedics. Her orthopaedic training continued in the Mersey Deanery, until she did her Hand Fellowship in Birmingham. She has now been a consultant in NHS Lothian since 2013, concentrating solely on hand and wrist surgery. She is a passionate trainer and has been an examiner for the FRCS (T&O) for the last 4 years. When not in work, Claire can be found under the waves of the sea of the West Coast of Scotland or the North Sea.

Tony Carlin	I have 22yrs experience in the health and social care sector as an		
	RMN, Registered Manager and Consultant in all areas of governance,		

compliance and quality. My career began as a nurse in Prisons when the NHS first took over Prison Healthcare provision, to secure forensic mental health and then adult social care. Over the last six years I have focused on supporting providers experiencing issues or difficulties following poor inspection outcomes, governance or quality reviews or in preparation for inspection. This has included management coaching and mentoring, mock inspections, crisis or turnaround management, training and general quality monitoring.

I now specialise in the governance field, delivering bespoke training and management support to organisations and providers in all aspects of preparing for and delivering CQC compliance.

Anton Potgieter

MBBCh, FC(Plast Surg)SA

I studied Medicine at The University of the Witwatersrand (WITS), Jhb. SA. After a few years in General Practice, I started General Surgery at the University of Cape Town (UCT), before moving back to Johannesburg to study Plastic Surgery. After completing my Specialty (Fellowship) with the College of Plastic Surgery, I did a Clinical Fellowship at Great Ormond Street Hospital in Paediatric Hand Surgery. After GOSH, I returned to SA and worked as one of the lead consultants for 5 years at Chris Hani Baragwanath Hospital (the biggest hospital in the Southern Hemisphere, with 3500 beds). As family life took over, I moved into Private Practice in Johannesburg for a 8 years, before the opportunity to move to the UK came along in 2021. I've been working in the NHS since early 2022 as a locum consultant and recently started a substantive position as an Associate Specialist at St George's Hospital, where my days are filled with the entire spectrum of Plastic Surgery. I have always tried to include outreach activities in my practice and have been involved with Operation Smile since 2012.

Delivering 1st world treatment to underprivileged patients is something I hope to keep doing for the rest of my career.

Soon Lim

MBBS, FRCGP

Former President of the ASPC, almost retired, but still alive and spotted teaching in Shires and Hamlets across the country. Former oracle and fount of useless minutiae on skin surgery and vasectomy. Usually recognised by his suitcase or supermarket trolley of tablets, laptops, cables, dongles, docks, DACs, and cameras at the conference. If you spot him in the wild, say hello and offer to buy him a pizza or curry. Largely harmless, despite being a Naginata Togi master.

Thank you for joining us for the ASPC conference. Please scan the below QR Code to complete our post conference feedback form.
